Federal Prosident's Message-The Louisville Journal-Cameron's

Been and revenue to actions: edit We lay before our readers this morning an ed o article from the Louisville Journal of the .vor 5th inst., commenting upon the recent mes-Congress. The language of the Journal is bold, deflant, and somewhat bitter. From the course the paper has pursued for some months past, we have not expected it to manlies an ledependent spirit, and we must condes to considerable surprise at its throwing reside its craven and submissive policy. It of difficult to realize that it is the Journal that speaks. We are not inclined to attribate its awakening to repentence for its sins, but rather to the necessity which it feels of doing something to save itself from the rule which must follow if it continue to stand by to over to over toolistication trave of herov

The message of Mr. Lincoln, though it may want directness and audacity, indicates plainly that, if he were sure of being upheld by the masses of the people, who own alleglance to his government, he would not hestitate to proclaim war against slavery, and enlist all the power of the government, civil mound military, for its overthrow. The Journal is conscious of this, and it is also conscious that in such a war the Union men of Kentucky, who are not abolitionists, will not engage, and that the Journal itself would be discarded and destroyed if it attempted to seduce them into such a trap.

We presume the Journal had not seen the report of the Secretary of War, when it denonneed the message; and we shall look with some interest for its comments upon the less cautions manifesto of Mr. Cameron. At considerable inacovenience, we publish this morning the Secretary's report, and commend it to the attention of the Southern people, especially the closing portions which relate to slavery and slaves. He does not hes-Itate to pronounce against slavery, and, if feet it, have re enacted in our midst all the horrors of a St. Domingo massacre.

What effect will the message and the Secretary's report have upon the people of Maryland, Delaware, Kentucky and Missouri who are still besitating about casting their foctunes with the Confederate States! Will they delay longer? If they have not lost all sense of shame, all manhood, and are not prepared to become slaves, they will, at once, take sides against the Washington despotism, and ald us in the deliverance of the slave States from oppression and tyranmy. If they do not act promptly they are forever rained and lost. how mo

Devont Advertiser.

We notice in a Yankee religious newspaper, a displayed advertisement for a wife. We give it gratuitous insertion, but no one need address this office as we are not acquainted with the advertiser:

A WIFE WANTED,

A MISSIONABY'S HOME has been rent by the death of a beloved mother. He needs a comforter, a counsel'er, and a friend. The vanity of this world, and the things of it, put them all together, and they will not make a help-meet for man. They will not suit the nature of the soul, nor supply its needs, nor satisfy its just desires, nor run parallel with its never-falling duration. Therefore, it being not good for man to be alone, God created woman to be a help-meet for him. See Genesis il. 18; Prov. xviii. help-meet for him. See Genesis II. 18; Prov. XVIII.

22. The applicant must possess a healthy body, practical plety, domestic habits, a competency, and, if possible, a musical talent. Address "MISSIONA-BY," at this office.

If any healthy, pious, domestic woman, with a comfortable fortane, but no ear for

music, has a longing for this connection, It seems that she need not be deterred by the wants of the last qualification, as that will not be insisted upon, although "if possible" she should add the throat of a varbler, to the sum of the other attractions. We suppose that it must be the just sense of "the vanity of this world" which induces the advertiser to be so easily satisfied in a partner for life. Good health, piety, domestic habits, and a competency, is seems, are all that would be indispensable to his gratification, although a musical talent, thrown in, would be highly appreci-ated. He is as easily contented as the child who summed up her simple wants in the desire for "nothing but victuals and raiment, and pretty good clothes."

What It Coats to Feed the Federal

Armys of bearings a The Union forces, regulars and volunteers, now in the field and in the course of organisation, amount, in round numbers, to six undred and fifty thousand men. It may be necessing to knew what an army of this trength will consume in the course of one menth. We therefore append the following figures, which are strictly correct:
14,625,000 pounds of pork, or 24,375,000
pounds fresh beef.

136 594 barrels of flour.

42,750 bushels of beans, or 1,950,000

1,950,000 pounds of coffee. 2,892,000 pounds of sugar. 195,000 gallons of vinegar. 12,249 bushels of mil.

The supply of candles is 292,500 pounds.

M week, and of soap [780,000 pounds.—St.

REPORT SIMON CAMERON. EDEBAL SECRETARY OF WAR.

WAR DEPARTMENT, Dec. 1, 1861. Sin: I have the honor to submit the an nual report of this Department.

The accompanying reports of the chiefs of the several Bureaus present the estimates of the appropriations required for the service of this Department during the fiscal year ending June 30, 1863, and also the appropriations necessary to cover deficiencies in the estimates for 1861-'62:

The following statement presents the entire estimated strength of the army, both

The several arms of the service are estiimated as follows: Infantry..... 557 208 11.175 54.654 20,380 Artillery Rifles and Sharpshooters ...

660,971

640,637 20,334 The appropriations asked for the service of the next fiscal year are computed for a force of 500,000 men. They have been reduced to the lowest possible amount consistent with the public interests, and are based upon a strictly economical administration of the various branches of this department.

The appropriations to cover deficiencies are rendered necessary by the excess of the he had his way, the slaves of the South would force in the field over that upon which the be armed against their masters, and we estimates were founded, and by extraordi-should, if the Federal authorities could ef-

Contingent. An item of very heavy expense is the large mounted force which has been organized, equipped, and made available since the called session of Congress, and which was not computed for in the estimate. While an increase of cavalry was undoubtedly necessary, it has reached a numerical strength more than adequate to the wants of the service As it can only be maintained at a great cost, measures will be taken for its gradual reduction need send it to the

In organizing our great army, I was effectively aided by the loyal Governors of the different States, and I cheerfully acknowledge the prompt patriotism with which they responded to the call of this Department.

Congress, during its extra session, authorized the army to be increased by the acceptance of a volunteer force of 500,000 men, and made an appropriation of five hundred millions of dollars for its support. A call for the troops was immediately made; but so numerous were the offers that it was found difficult to discriminate in the choice, where the patriotism of the people demanded that there should be no restriction upon enlistments. Every portion of the loyal States desired to swell the army, and every community was anxious that it should be represented in a cause that appealed to the noblest impulses of our people.

So thoroughly aroused was the national heart, that I have no doubt this force would

have been swollen to a million, had not the Department felt constrained to restrict it. in the absence of authority from the repre sentatives of the people to increase the limited number. It will be for Congress to decide whether the army shall be further augmented, with a view to a more speedy termi nation of the war, or whether it shall be confined to the strength already fixed by law. In the latter case, with the object of reducing the volunteer force to 500,000, I propose, with the consent of Congress, to consolidate such of the regiments as may from time to time fall below the regulation standard. The adoption of this measure will decrease the number of officers, and proportionably diminish the expenses of

It is said of Napoleon, by Jomni, that, in the campaign of 1815, that great general on the first of April had a regular army of 200,000 men. On the first of June he had increased this army to 414,000. The proportion adds Jomni, "had he thought proper to inaugurate a vast system of defease, would have raised it to 700,000 men by the 1st of September." At the commencement of this rebellion, inaugurated by the attack 16,006 regulars, principally employed in the West to hold in check marauding Indians. In April 75,000 volunteers were called upon to enlist for three months' service, and responded with such also in the force being doubled. vice, and responded with such alacrity that tions vigorously prosecuted day and night, 77,875 were immediately obtained. Under there were made at this establishment, the authority of the act of Congress of July 22, 1861, the States were asked to furnsh .00,000 volunteers to serve for three

lapoleon with the aid of all these appliances, was considered an evidence of his wonderful genius and energy, and of the military spirit of the French nation. Here every man has an interest in the Government, and rushes to its defense when danger beseis it.

By reference to the records of the revolution, it will be seen that Massachusetts, with a population of \$50,000, had at one time 56,000 troops in the field-a force greatly exceeding the whole number of troops furnished by all the Southern States during the war. Should the present loyal States furnish troops in like proportion, which undoubtedly would be the case should any emergency demand it, the Government could promptly put into the field an army of over three millions.

It gives me great satisfaction to refer to the creditable degree of discipline of our treops, most of whom were, but a short time since, engaged in the pursuits of peace. They are rapidly attaining an efficency which cannot fail to bring success to our arms. Officers and men alike evince an earnest desire to accomplish themselves in every duty of the camp and field, and the various corps are animated by an emulation to expel each other in soldierly qualities.

. The conspiracy against the Government extended over an area of 733,141 square miles, possessing a coast line of 3,525 miles, and a shore line of 25,414 miles, with an interior boundary line of 7,031 miles in length. This conspiracy stripped us of arms and munitions, and scattered our navy to the most distant quarters of the globe. The effort to restore the Union, which the Government entered on in April last, was the most gigantic endeavor in the history of civil war. The interval of seven months has been spent in preparation.

The history of this rebellion, in common with all others, for obvious causes, records the first successes in favor of the insurgents. The disaster at Bull Run was but the natural consequence of the premature advance of our brave but undisciplined troops, which the impatience of the country de-manded. The betrayal also of our movements by traitors in our midst enabled the rebels to choose and intreuch their position, and by a reinforcement in great strength, at the moment of victory, to snatch it from our grasp. This reverse, however, gave no discouragement to our gallant people; they have crowded into our ranks, and although large numbers have been necessarily rejected, a mighty army in invincible array stands eager to precipitate itself upon the foe. The check that we have received upon the Potomac has, therefore, but postponed the cam paign for a few months. The other successes of the rebels, though dearly won, were mere affairs, with no importance or permanent advantages. The possession of Western Virginia, and the occupation of Hatter-as and Beaufort, have nobly redeemed our transcient reverses.

At the date of my last report the States of Delaware, Maryland, Kentucky and Missouri were threatened with rebellion. In Delaware, the good sense and parriotism of the people have triumphed over the unholy schemes of traitors. The people of Kentucky early pronounced themselves, by an unequivocal declaration at the ballot-box, in favor of the Union; and Maryland, notwithstanding the efforts of bad men in power in the city of Baltimore, when the opportunity of a general election was afforded, under the lead of her brave and patriotic Governor, rebuked by an overwhelming majority, the traitors who would have led her to destruction. In Missouri, a loyal State Government has been established by the people, thousands of whom have rallied to the support of the Federal authority, and in conjunction with troops from other portions of the country, have forced the rebels to retire into the adjoining State. The Government established in Virginia by the loyal portion of her population, is in successful operation, and I have no doubt will be sustained by the people of the entire State whenever the thraidom of the rebel forces shall have been removed.

Thus has it been made clearly apparent that in whatever direction the forces of the Union have extended their protection, the repressed loyalty of the people, irresistibly cadets at that important in titution. I am manifesting itself, has aided to restore and assured by the Superintendent that 400 can maintain the authority of the Government: at present be accommodated, and that, with Department, in accordance with such regulaand I doubt not that the army now assembled on the banks of the Potomac, will, under its able leader, soon make such a demonstration as will re-establish its authority throughout all the rebellious States.

The loval Governor of Virginia is proceeding to organize courts under the constitution and laws of the State in all her Eastern counties in the occupation of our troops. I respectfully suggest that authority should be given to the President to send Commissioners with the army, with power to exercise all the functions of local government wherever the civil authority has ceased to exist, and especially to enforce the obligations of contracts, and the collection of debts due to loyal creditors.

As stated in my last Report, at the commencement of this rebellion the Government found itself deficient in arms and munitions of war, through the bad faith of those entrusted with their control during the preceding administration. The Armory at Harper's Ferry having been destroyed to prevent its possession and use by the rebels, the Government was compelled to rely upon the single armory at Springfield, and upon private establishments, for a supply of arms. during the past month of October, a total of 6,900 muskets; and it is confidently expected that 10,000 will be manufactured

needed in the manufacture of arms, it is at | covery of the sick. the same time accessible to every part of the country by water and railway communica-

After having made contracts for arms with the private establishments in this country, it was deemed necessary by the President, to insure a speedy and ample supply, to send a special agent to Europe with funds to the amount of two millions of dollars to purchase more. I am gratified to men of inferior qualifications are placed in state that he has made arrangements for a command over those in the ranks who are state that he has made arrangements for a command over those in the ranks who are all States greatly improved facilities for large number of arms, part of which have their superiors in military experience and reaching the national capital, and at much

shall have been received. Combinations among manufacturers, importers and agents, for the sale of arms, have, in many cases, caused an undue increase in prices. To prevent advantage being thus taken of the necessities of the Government, Collectors of Customs have been directed to deliver to the agents of the United States all arms and munitions that

may be imported into this country. The demand for arms has called into existence numerous establishments for their manufacture throughout the loyal portion of the country, and it has been the policy of this Department to encourage the development of the capital, enterprise and skill of our people in this direction. The Govern-ment should never have less than a million of muskets in its arsenals, with a corresponding proportion of arms and equipments for artillery and cavalry. Otherwise, it may, at- a most critical moment, find itself deficient in guns while having an abundance

I recommend that application be made to Congress for authority to establish a national foundery for the manufacture of heavy artillery, at such point as may afford the greatest facilities for the purpose. While a sufficient number of cannon, perhaps, could be procured from private manufactories, the possession of a national establishment would lead to experiments which would be useful to the country, and prevent imposition in prices by the accurate knowledge that would be acquired of the real value of work of this character.

In my last report, I called attention to the fact that legislation was necessary for the re-organization, upon a uniform basis, of the Militia of the country. Some general plan should be provided by Congress in aid of the States, by which our Militia can be organized, armed and disciplined, and them by those whose commissions depend made effective at any moment for immediate service. If thoroughly trained in time of addition, the Volunteer is allowed to draw peace, when occasion demands, it may be his full pay of \$13 per month, while by law converted into a vast army, confident in its \$2 per month are deducted from the pay of discipline and unconquerable in its patriot- the Regular, to be returned to him at the ism. In the absence of any general system end of his term of service. In my judg-of organization, upwards of 700,000 men ment, this law should be repealed and the have already been brought into the field; Regular soldier be allowed to receive his and, in view of the alacrity and enthusiasm | full pay when due. He should also receive that have been displayed, I do not hesitate either a reasonable bounty upon enlisting. to express the belief that no combination of events can arise in which this country will law of the last session of Congress grants not be able not only to protect itself, but, to regulars and volunteers on the expiration contrary to its policy, which is peace with of their terms of service. This would all the world, to enter upon aggressive operations against any power that may intermeddle with our domestic affairs. A committee should be appointed by Congress. with authority to sit during the recess, to devise and report a plan for the general organization of the Militia of the United States.

It is of great importance that immediate attention should be given to the condition of our fortifications upon the seaboard and the lakes, and upon our exposed frontiers They should at once be placed in perfect condition for successful defense. Aggresready to defend its honor and to repel in embarrassing from their nature and extent. sults; and we should show to the world that while engaged in quelling disturbances at home we are able to protect ourselves against attacks from abroad.

I carneatly recommend that immediate provision be made for increasing the corps Military Academy. There are now only 192 very trifling additional expense, this number may be increased to five hundred. It is not necessary, at this day, to speak of the | country. value of educated soldiers. While, in time of war or rebellion, we must ever depend mainly upon our militia and volunteers, we cians now allowed by law being too great shall always need thoroughly trained offi- and not at all commensurate with their cers. Two classes having been graduated heavy expense, during the present year, in order that the service might have the benefit of their military education, I had hoped that Congress, at its extra session, would authorize an in- kind occurred in the management of the crease of the number. Having failed to do railroads between Baltimore and New York. so, I trust that at the approaching session an increase will be authorized, and that the selection of cadets will be limited exclusively to those States which, co-operating cordially with the Government, have brought their forces into the field to aid in the maintain-

ance of its authority. In this connection, justice requires that I shold call attention to the claims of a veteran officer, to whom, more than to any other, the Military Academy is indebted for its present prosperous and efficient condition. I allude to Col. Sylvanus Thayer, of the Engineer corps, who now, by reason of advanced years and faithful public services, is incapacitated for duty in the field Under the recent law of Congress he may justly claim to be retired from active service: but, believing that his distinguished services should receive some mark of ac- pensation knowledgment from the Government, I recommend that authority be asked to retire him upon his full pay and emoluments.

The health of an army is a consideration of the highest consequence. Good men and women in different states, impelled by the years, or during the war; and by the act ap-proved the 29th of the same month, the ad-dition of 25,000 men to the regular army of the armory, I directed the purchase of a sanitary arrangements of the Government, at Annapolis and along the branch road. the United States was authorized. The result is, that we have now a standing army of upward of 600,000 men. If we add to this establishment to produce, during the number of the discharged three months volunteers, the aggregate furnished the purchase of a sanitary arrangements of the dovernment, at Annapolis and along the branch road.

Should the navigation of the Potomac ing disease in the camps, giving increased this establishment to produce, during the this establishment to produce, during the our hospital services of winter, it would become absolutely ri and lows, their boundaries could be so soldier, and imparting to our hospital services a more humane and generous characters.

to the Government since April last exceeds suggest the recommendation of a liberal ter. Salubrity of situation and pleasant-Too,000 men.

We have here an evidence of the wonderful strength of our institutions. Without conscriptions, levies, drafts or other extraordinary expedients, we have raised a greater force than that which, gathered by greater force than that which, gathered by Namelson with the country in the midst of an industrious and will be attached to aware distance and Annapolis, and will be attached to aware distance and annapolis, and will be attached to aware distance and annapolis, and will be attached to aware distance and annapolis, and will be attached to aware distance and annapolis, and will be attached to aware distance and annapolis, and will be attached to aware distance and annapolis, and will be attached to aware distance and annapolis, and supply all the recommendation of a noterial ter. Satublity of situation and pleasant—
ness of surroundings have dictated the choice of the bospital sites, and establish—
ments for our sick and wounded, of which we have every reason to be proud, have been opened in St. Louis, Washington, bonds; they binding themselves to set a annually a sufficient sum for their reder country, in the midst of an industrious and will be attached to every division of the ingenious people, where competent workmen army in the field. To the close of the war can always be obtained without difficulty, vigilant care shall be given to the health of er, and to charge, for transportation, rates can always be obtained without difficulty, vigilant care shall be given to the health of and sufficiently near to all the materials the well soldier, and to the comfort and re-

I recommend that the system of promotions which prevails in the Regular service promotions to men actually in the field. At the officers for the troops furnished by his five to eight cents per mile. The large sav-State, and complaint is not unfrequently ing to the Government in cost of transpor-State, and complaint is not unfrequently made that, when vacancies occur in the field, already been delivered. The remainder will capacity. The advancement of merit should be shipped by successive steamers until all be the leading principle in all promotions, and the volunteer soldier should be given to understand that preferment will be the sure reward of intelligence, fidelity and distinguished service.

The course above recommended has been pursued by this Department, and it is my intention, so far as in my power, to continue a system which cannot fail to have the most beneficial effect upon the entire service.

By existing laws and regulations an officer of the Regular army ranks an officer of Volunteers of the same grade, notwithstanding the commission of the latter may be of near Harper's Ferry, by means of the Loudon antecedent date. In my judgment, this and Hampshire railroad. To its importance practice has a tendency to repress the ardor as affording facilities for moving troops and and to limit the opportunity for distinction supplies in time of war, may be added the of Volunteer officers, and a change should be made by which seniority of commission should confer the right of command.

I submit for reflection the question, whether the distinction between Regulars sive ferry at Georgetown, and by greatly and Volunteers which now exists, should be permitted to continue. The efficiency of he army, it appears to me, might be greatly increased by a consolidation of the two during the continuance of the war, which, combining both forces, would constitute them one grand army of the Union.

Recruiting for the Regular army has not been attended with that success which was anticipated, although a large number of men have entered this branch of the service. While it is admitted that soldiers in the Regular army under the control of officers of military education and experience are generally better cared for than those in cultural productions of the West. To aid the Volunteer service, it is certain that the popular preference is largely given to the latter. Young men evidently prefer to enter a corps officered by their friends and acquaintances, and, besides the bounty granted to volunteers in most of the States. inducements are often directly offered to upon their success in obtaining recruits. In or an advance of \$20 of the \$100 which a doubtless stimulate enlistments, as it would allow the soldier to make some provision for those dependent upon him for support until he receives his pay.

By the Act approved August 5, 1861, the President is authorized to appoint as many aids to Major Generals of the Regular army, acting in the field, as he may think proper. The number of aids, in my opinion, should be limited, and no more should be allowed to each Major General than can be advantageously employed upon his own proper staff. Much expense would thus be saved, and the Executive and this Departsions are seldom made upon a nation ever ment would be relieved of applications very

The fifth section of the act approved September 28, 1850, makes the discharge of minors obligatory upon this Department, upon proof that their enlistment was with out the consent of their parents or guardians. In view of the injurious operation of cadets to the greatest capacity of the of this law, and of the facilities which it opens to frauds, I respectfully urge its early repeal. Applications for discharge of minors can then be determined either by this tions as experience may have shown to be necessary, or by the civil tribunals of the

The employment of regimental bands should be limited; the proportion of musi-

Corporations, like individuals, are liable to be governed by selfish motives in the absence of competition. An instance of this The sum of six dollars was charged upon that route for the transportation of each soldier from New York to Baltimore. As this rate seemed extravagant to the Department, when considered in connection with the great increase of trade upon these roads. made necessary, by the wants of the Gov-ernment, inquiry was made concerning the expediency of using the roads from New York to Baltimore, via Harrisburg. The result was an arrangement by which troops were brought by the last named route at four dollars each; and, as a consequence, this rate was at once necessarily adopted by all the railroads in the loval States, making a saving to the Government of 331 per cent. in all its transportation of soldiers, and at the same time giving to the railroads, through increased business, a liberal com-

The railroad connection between Washing ton and Baltimore has been lately much Improved by additional sidings, and by extensions in this city. In order, however, that abundant supplies may always be at the command of the Department, arrange-ments should be made for laying a double track between this city and Anapolis Junction, with improved sidelings and facilities

of the inhabitants of this city, to provide add annually a sufficient sum for their rede in no case to exceed four cents a ton pr mile for freight, and three cents per mile for passengers. During the continuance of the be applied to the Volunteer forces in the respective States; restricting, however, the portation of passengers between the two promotions to men actually in the field. cities is at present 32 gents per mile, and for present each Governor selects and appoints freight, the rates per ton will average from tation, would amply compensate for all lia-bility, and give to the citizens of all the loyless rates than they are now compelled to pay. To the citizens of the District it would cheap en the cost of supplies, and prove of immen-e value in every respect.

I recommend that a railway be constructed through this city from the Navy Yard, by the capitol, to Georgetown, forming connections with the existing railroad depots, and using the aqueduct bridge for the purpose of crossing the river at Georgetown. By a junction of this proposed railway with the Orange and Alexandria railroad, not only would the communication with our troops in Virginia be greatly improved, but an easy access be obtained to the Baltimore and Ohio railroad future benefits it would confer upon the Dietrict of Columbia. The outlay required would be saved in a few months by enabling the Government to dispense with the expen decreasing the costly wagon transportation of the army through this city.

The injuries to railroads, instigated by the rebel authorities of Baltimore, in order to emberrass communication with the North and West, via Harrisburg, and with the East, via Philadelphia, have been repaired by the dif ferent companies that own them. That portion of the Baltimore and Ohio railroad west of Harper's Ferry which was so ruthlessly destroyed by the rebels, has not yet been restored. The great interests of trade require that this road should be re-opened as speedily as possible by the company, for the transpor tation of the immense surplus of the agrithis object the Department has tendered to the company a sufficient force for its protec tion during the progress of the work, and will render such facilities as it may be able to provide, in connection with its other im portant public duties.

For the purpose of facilitating the trans portation of supplies to Alexandria and to points beyond, it has been found necessary to rebuild portions of the Orange and Alexandria and the Loudon and Hampshire railroads, and to lay a track from the railroad depot to a point on the Potomac river, in this

Under an appropriation granted for that purpose at the last session of Congress, p Telegraphic Bureau was established, and has been found of the greatest service in our military operations. Eight hundred and fiftyseven miles of telegraphic line have been already built and put in operation, with an efficient corps of operators, and a large ex tension is now in process of construction.

Congress, at its late session, made an appropriation for the reconstruction of the Long Bridge across the Potomac, which, in its then dilapidated condition, was unsate for military purposes. The work, which has been carried on without interruption to trade or travel, is rapidly approaching completion, and, when finished, will be a substantial structure.

On the first of the present month Lieutenant General Winfield Scott yoluntarily relinquished his high command, as general inchief of the American army, He had faith fully and gallantly served his country for upwards of half a century, and the glory of his achievements has given additional lustre to the brightest pages of our national annals. The affections of a grateful people followed him in his retirement. The President immediately conferred the command of the army upon the officer next in rank. Fortunately for the country, Major General McClellan had proved himselt equal to every situation in which his great talents had been called into exercise. His brilliant achievements in Western Virginia, the untiring energy and consummate stillty he has displayed in the organization and discipline of an entirely new army, have justly won for him the confidence and applause of the troops and of

Extraordinary labor, energy and talent have been required of the various Bureaus of this Department to provide for the wants of our immense army. While errors may have been occasionally committed by suborinates, and while extravagant prices have andoubtedly in some cases, controlled by haste and the pressure of rapid events, beek paid for supplies, it is with great gratificatration of affairs displayed in the various branches of the service. Our forces had not only to be armed, clothed and fed, but had to be suddenly provided with means of transportation to an extent heretofore unparalleled. While I believe that there is no army in the world better provided for in every respect than our regulars and volunteers. I candidly think that no force so large, and so well equipped, was ever put in the field in so short a space of time at so small

While it is my intention to preserve the strictest economy and accountability, I, think the last dollar should be expended and the last man should be armed to bring this unboly rebellion to a speedy and permanent

The geographical position of the metropelis of the nation, menaced by the rebels, and required to be defended by thousands of our troops, induces me to suggest for considera-tion the propriety and expediency of a re-construction of the boundaries of the States of Delaware, Maryland and Virginia. Wisdom and true statesmanship would dictate that the seat of the National Government, for all time to come, should be placed beyond reasonable danger of seizure by enemies within, as well as from capture by foes from without. By agreements between the States named, such as was effected for similar por-

campaign to Missouri, on the rates of postmaster bore, and a feading Democontracted or ison and a supposite to Missouri, on the amortismment of troops or the country two country.
